A schematic diagram of a system. On the left is a large rectangular block labeled 2. A horizontal line extends from the right side of block 2, passing through a square valve symbol (a square with an 'X' inside) labeled 4. After the valve, the line splits into two parallel horizontal branches. The upper branch leads to a rectangular block labeled 20. The lower branch leads to a rectangular block labeled 22. Both branches rejoin a single horizontal line that continues to the right.
